C3 Point of Sale

Overview

C3 POS is a Point of Sale solution for companies that are already using Oracle's E-Business Suite. C3 POS uses your existing Oracle applications database and integrates with your EBS modules including Order Management, Pricing, iPayments, Receivables and Inventory. C3 POS processes standard retail transactions such as customer sales and returns, cash drawer balancing, payment on accounts, and then hands off the information to the standard modules. Additionally, C3 POS lets the Oracle standard modules perform the functions they are designed for without creating redundant functionality (e.g. Purchasing, Inventory Planning, Inventory Management, etc.).

Tools that help you stay competitive and grow your business

- ♦ Reduce Costs
- ♦ Increase Productivity
- ♦ Improve communications
- ♦ Add new functionality to existing system
- ♦ Improve return on EBS investment

Technology that brings a Full Range of POS Functionality

- ♦ Web enabled transactions and reporting
- ♦ Bar code scanners
- ♦ Magnetic strip readers
- ♦ Interface to on-line credit card authorizations
- ♦ Virtual receipt screen display
- ♦ Touch screen processing

Key Product Advantages

- ♦ Eliminate additional or synchronized databases
  - C3 POS & Oracle EBS use the same, single database
  - Seamless integration with your Oracle applications

- ♦ Reduce the Total Cost of Ownership with C3 POS
  - No need for additional databases and servers
  - Works with all EBS business processes
  - Open standards technology integrates with applications and hardware
  - Rapid to deploy and easily configurable (reduce time to ROI)

Leverage your Existing Oracle Configuration

- ♦ Customers, Items and Suppliers
- ♦ Accounting Rules
- ♦ Purchasing and Payables Flows
- ♦ Price /Discount Structures
- ♦ Credit and Collection Procedures
- ♦ Inventory Replenishment System
- ♦ Reporting
- ♦ Payment Processing

C3 POS is Fully Integrated

- Oracle Inventory
- Oracle Pricing
- Oracle Receivables
- Oracle General Ledger
- Oracle iPayment

**Various Payment Methods for Transactions**
